# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17. THE REDCLIFF REVIEW, THURSDAY, NOV. 15th, 1928 Number 38

## Impressive Armistice Service Last Sunday

Was Held in Gordon Memorial Uuder Auspices of Legion

Gordon Memorial church was taed to its capaxcity to accommodate the large congregation which joined with the local Legion for their annual Armistice service held in that church last Sunday evening.

A splendid program was prepared for the occasion and was caried out in acordance with a country wide service observed on that day. The service was most impressive from the two minutes' silence at the opening to the Lament: "Flowers of the Forest" played at the finish by the pipe band from Medicine Hat. ....

About fifty members of the Legion met at the club rooms and, headed by the pipe band, marched to the church.

Rev. W. B. Smith, pastor of the congregation, preached a very appropriate sermon for the occasion. His subject was: "A Dawn Without a Day." His text was from Isaiah 21st, 11th and 12th: "One calletr to me out of Seir, 'Watchman, what of the night? Watchman, what of the night?' The watchman saith 'the morning cometh and also the night: if ye will inquire, inquire ye; turn ye, come."

The speaker sad that since the first Christmas morning when the angel choir sang "Peaceo on Earth and Good Will Among Men'" it appears as though mankind has been looking for a day that never will come. Alexander couquered the whole world but brought no peace and goodwill among men. Constantine's dream terned to be a mirage. Napoleon nearly realized his ambition of a world monarch but brought no peace. The Great War was a war to end war but some people think that was a dawn without a day. They have watched for the day but it has not come. The international system received a tremendous shck from which it has not and may not recover. One war leads to another and as we scan the horizon for the day of peace and good will among men it is not in that way we see it arise. But was there ever a dawn without a day? he asked. Certainly not in the physicalworld. He said it was a hopeful sign of our day that there are indications of day break on the horizon. We have the League of Natins, the Kellog Pact and the increase of study of world brotherhood. There is no instinctive hatred and suspicion between the races. We are trained to that. You seldom hear a returned man saying much against the enemy. Hatred, malice and suspicion are not instinctive. They are taught.

The day is coming up o'er the red streams of blod and sacrifice The sacrifice of so much splendid manhod shuld nt be in vain. The day is coming slowly through pain and travail of broken hearts, empty chairs, armless sleves and wounds hidden away, too sorrowful to stand the gaze of a new generation. A great change has cme over us since the first tumultuous days of victory and today we call to remembrance thse who were left behind when the boys came marching home. We are learning we can wipe out our enemies by wiping out our enmities.. It is not the will of God that man shuld shoot down his fellow man but that they shuld work together for the glory of God and the welfare of mankind. When we get up on to the mountain tops of the love of God in Jesus Christ we shall see that in Christ there is no east and west but one great common brotherhood brought into being by the Suprema Sacrifice on Calvary's Cross.

During the service a wreath was placed on the Roll of Honor which hangs in the church.

## Here and There

(179)

The Canadian Pacific has decided on a new ferry service between Steveston, on the mainland, and Sydney, on Vancouver Island, according to Captain C. D. Nereutsos, manager of the B. C. Coast Steamship Service. The new service will begin early next summer, being inspired by the increased demand for short water hauls.

Tourists to Victoria, the capital of British Columbia, this year numbered 370,000, according to the Victoria Publicity Bureau. Tourist travel from Canadian points and from the west coast of the United States to Vancouver Island and Victoria, via the C. P. R. and the coastal steamship service, show an increase over last year.

New York newspaper cameramen want cow-boys to do their stuff on the parapets of sky scrapers and are not content with ordinary portraits, was the somewhat bitter observation of Guy Weadick, manager of the Calgary Stampede, who returned to Canada recently from participating in Tex Rickard's radio in Madison Square Garden, New York. "They wanted real action for photographs," he said, "and we had to lasso policemen from the top of busses on Fifth Avenue to please them."

Grain storage facilities of the harbor of Vancouver, B.C., which now exceed 10,000,000 bushels, will be largely increased next season, it is believed, in view of the fact that storage bins are already nearly full and the westward flow of grain may have to be reduced in consequence. It is being reported currently that the Alberta Wheat Pool, the Midland-Pacific Terminals and other groups will add storage capacity to existing terminal houses.

Over 175,000 trees have been planted along the main highways of the province of Quebec during the past two years by the Roads Department, in following out its embellishment scheme, which includes co-operation from residents along the roads. "Since the beginning of the season," states an official bulletin, "the Minister of Roads has been insisting on the importance of beautifying roadsides. Tourists can now travel throughout the province on modern and perfectly maintained roads."

"Canary Korndyke Alcartra," Holstein-Friesian cow belonging to the herd of Ben. H. Thompson of Boharm, Saskatchewan, has been declared world's champion butter-fat producer, according to an advice received by the owner from the live stock commissioner at Ottawa, stating that the cow has won the world championship with an enormous margin to spare. The record of Canary Korndyke Alcartra for 305 days was 1,080 pounds of butter-fat, or 106 pounds more than any previous record holder. In the 305-day period the cow produced 26,396 pounds of milk with an average test of 4.04 butter-fat.

There is no doubt in the mind of L. S. James, of New York, as the New York Central Railway, as to whether moose will attack human beings. Although the subject is a controversial one among big game hunters, decisive testimony was afforded recently in the experience of Mr. James in the Metagama district, lying between Sudbury and Chapleau in Northern Ontario. He was paddling in his canoe along the shore of the Spanish River and came upon a bull moose unawares. The animal at once gave chase and only by dint of hard paddling by Pete Commanda, the Indian guide, were they able to escape. Another canoe in rear was similarly pursued.

Australa wil hold a general electio on November 17th.

**JOHN JOHNSON**

John Johnson, whose appointment to the position of manager of the Chateau Frontenac, Quebec, is announced to be effective November 1st. Mr. Johnson joined the staff of the Chateau Frontenac as clerk in 1920, and became assistant manager in 1924. He succeeds B. A. Neale, who is appointed to the Royal York Hotel, Toronto.

### ADDITIONAL LOCALS

There was a good crowd at the auction sale at Mrs. Grieve's last Wednesday. The bidding was brisk and good prices were realized for everything but horses.

* * *

Joe Podesta and Joe Jacobsen were very succesful in their deer hunt last week. They got a der each, out in the Eagle Butte district. ..........

James A. Hallworth, eldest son of Mr. and Mrs. J. H. Hallworth, of Medicine Hat, formerly of Redcliff, died at the home ff his parents last Tiesday. He was 16 years of sage.

Robt. Louden, a pioneer of this district, has not been enjoying the best of health for the past two weeks. He left last week end for McLeod to visit his sister for the winter.

* * *

Gool progress is being made in finishing Gordon Memorial church, but the Globe Furniture Co., Waterloo, Ont., state that they cannot deliver the seets until the beginning of the new year

* * *

Every issue of the Family Herald and Weekly Star of Montreal is worth the year's subscription price to the farmers of Canada, and farmers' famllies rejcice in getting the addition of a supurb magazine.

* * *

Reseve yourself for a whist drive social to be held in the Parish Hall on Nov. 29th commencing at 8 p. m. Good prizes will be offered and a really happy evening will be enjoyed by those who are there. * * *

* * *

While at his work n the Brick & Coal shale mine, last Wednesday, M. B. Walker met with a painful accident. He was handling a scraper when it struck a stone and the lever hit him on the chin, inflicting a nasty gash.

* * *

Ww. Nusey certainly made a complete job of cleaning up the corner on Broadway where the old Royal bank was. It is one of the best clea-ups after tearing down a building there has even been in town.

## The Legion Dance Was Great Success

Large Crowd Present And An Enjoyable Evening Spent

There was a good turn out at the Legion whist drive and dance in Cliff hall last Monday evening. So large was the crowd that at lunch time it was necessary to add to the larder in order t suply refreshments for all.

The whist drive was closely contested and the prizes were awarded as follows: Ladies' 1st, Mrs. Phillips; Gent's 1st, Ww. Yates. Ladies' 2nd Mrs. Davies Gent's 2nd F. Garnett. Conslations went to Mrs. Balmer ad F. Kane. After the whist the rall was cleared for action and all enjoyed a few hours dancing. Refreshments were served during th vening. The event was a great sucess. The committee in charge wish us to extend the thanks of the Legion to all who help make it so.

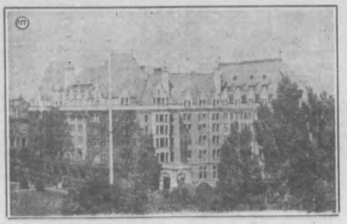
### LIVESTOCK UNION TO MEET IN EDMONTON

Arrangements are being made for the annual meeting of the Western Canada Livestock Union whichs tio be held in Edmonton Feb. 20-22. Problems of the beef cattle industry will have a place in the program of the convention, which will also receive a report of the recent World's Dairy Congres held in London. Provision will be made for full discussions of district problems which may be brought up by any member in attendance.

### GASOLINE CONSUMPTION STEADILY INCREASING

Sales of gasoline in Alberta for the first ten months of 1728 have exceded by some 6,000,000 gallons the sales of any previous year, according to figures issued by the department of the Provincial Secretary. This increased consumption is attributed to the ever-growng use of tractors, gran tucks and combined harvesters in the province as well as the increased number of automobiles licensed during the present year. .....

## Mediaeval Mystery Play Revived



The Empress Hotel, Victoria, the beautiful grounds of which will be brilliant with holly berries during the season of rivalry, being arranged as an old English Christmas festival.

Imagine Christmas in England in 1328, 600 years ago. The dawn of the Reformation was all but breaking, but the Church still held place of power in state as in religion, and had been for centuries the fount of all learning. A primitive age—rough and relentless, and its people were primitive to a degree hardly conceivable in this age. Rough, hard living was lightened by rough hard play and such church festivals as Christmas were celebrated in carousing and high revels by those as could command the means for such employment. Religious teaching came to the mass of the people only by word of mouth, and as a means of making the New Testament stories living and understandable, incidents of the Bible story were presented in simple plays as primitive as the understandings of their audiences. They were called Mystery Plays and one of the first of them, and, therefore, perhaps, the first of all plays to be performed in England was the story of the adoration of the shepherds and the Magi, written by Randall Higden, a monk of Chester Abbey and first performed at Christmas in the year 1328, just six hundred years ago.

From that day to this is a long time, but there has been a revival of interest in the beautiful things of mediaeval days, and a few years ago the Chester Mysterica were brought to Canada and presented for the first time in America at Hart House Theatre, Toronto University. There they met with instantaneous success, and for several Christmases were a feature of Toronto's holiday celebration. Later they were presented as part of a Christmas service in the chancel of the church of St. Mary Magdalene, Toronto. It will next be seen at Victoria, B.C., as part of the old English Christmas celebration that is being arranged to take place at the Empress Hotel there this year.

It will be the central feature of a notable revival of the Christmas customs of England dating from the middle ages down to the time of Dickens and Mr. Pickwick. In the costumes of that periods, singers, actors and musicians will, between Christmas and Twelfth Night lead the revels and the entire celebration will wind up with a costume ball. Victoria is already famous as a winter resort. Its mild, pleasant weather permitting golf and motoring practically every day and its wonderful salt-water swimming baths have made the most English city in North America an ideal place in which to spend the winter, and with the programme of Christmas revels it is likely that the number of visitors to that city from the prairies and from some of the western states will be unusually large.

## Churches

### ST. AMBROSE CHURCH

Rev. J. L. Cooper

24th Sunday after Trinity Nov. 18th.

Holy Communion 8 a.m.
Sonday school at 10
Mattins and sermon at 11.
Evencong and sermon 7:30

Tuesday, Nov. 20 childrens' choir practice in church 4:15.

Wednesday, Nov. 21 Ruridecanal conference at St. Barnabus Medicine Hat, commencing with Holy Communion at 8 a.m.

Thursday, Nov. 22nd Sunday school teachers' meeting at vicarage at 7:30.

Friday, Nov. 23rd Evenaong 7:30 followed by choir practice.

### GORDON MEMORIAL UNITED CHURCH

Rev. W. B. Smith, Pastor

Organizations meet as follows—and to share in the activities of Gordon Memorial church.

Strangers and visitors are very cordially invited to attend the services

The Official Board on 2nd Tuesday in each quarter at 8 p.m.

Committtee of Stewards on the 2nd Tuesday of each month at 8 p.m.

Women's Missionary Society on the last Thursday of each month at 3 p.m.

Ladies' Aid, every Thursday, 3 p.m.

Mission Band every second Monday at 4:15 p.m.

Services will be held as usual next Sunday. In the morning at 11:15 and in the evening at 7:30

The subject on Sunday morning Nov. 18th will be "John Bunion—the man;" At the evening service the theme will be "Praise." .... ..

The senior group of the C. G. I. T. have reorganized with Nannie Learmonth, president; Eva Pinder, vice president; Elsie Fray, secretary and Greta McKay, treasurer.

The senior boys of the Sunday school are selling calendars for 1929. As these give the Sunday school lessns and a worth while mesange for each day we hope the members of the congregation and friends will buy frm the bys. The calendars make good Christmas gifts.

### CHURCH OF THE BRETHREN

Rev. D. Hollinger, Minister

Usual services.

### ST. MARY'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at at 8:30 a m

A revision of the Alberta School Act is being prepared and will be presented at the next session of the legislature.

**B. A. NEALE**

B. A. Neale, popular manager of the Chateau Frontenac, whose appointment as manager of the new Royal York Hotel in Toronto is announced to be effective November 1st. The managing of the Royal York is considered the most ambitious hotel position on the continent. Mr. Neale has steadily risen in Canadian Pacific service since 1911, when he transferred to the hotel department from the General Superintendent's office in Montreal.

## Young Lad Has A Bad Accident

George Keohler Hurt By Freigrt Wednesday Morning M

George Kohler, six year old son of Mr. and Mrs. Zacharis Kohler of this town, met with a bad acident Wednesday morning as a result of which he had his left leg badly mangled and lacerated by coming in contact with a moving box sar.

It appears that several boys are in the habit of watching for empty cars coming in to be loaded at the several plants, to sweep them out to get the grain out of them for chicken feed. When tre way freight pulled into the siding south of Broadway on Wednesday morning about 8:30 George attempted to get into one of the box cars while it was still moving. Owing to the frosty rails he slipped and in some way got caught in the wheels of the car with the above result. The first intimation members of the train crew had that anything was wrong was when they heard the boy's cries. One of the breakmen caught the boy up and rushed to Dr. Rogers' office with him while another trainman ran ahead to have everything in readiness. After rendering first aid Dr. Rogers got his car and took the lad to Medicine Hat hosptal where, after examnation it was decided to try to save the leg if possible. The wound was atended to but it will be a few days before it will be known whether or not amputation will be necesary. Present signs are mst encouraging for savig the leg.

### PROVINCIAL CORN SHOW IS CANCELLED

Owing to the unusual weather conditions during the latter part of August and early September and the consequent reduction in the quality of much of the corn grown, the directors of the Provincial Corn Growers' Association, after making careful survey of the situation, have decided against the holding of a corn show ths fall. It may be noted that similar action has been taken by those n charge of the Saskatchewan show for this year.

### GEORGIAN SINGERS HAD GOOD ENTEREAINMENT

The Georgian Singers who appeared here this wek under the auspices of the local Legion, put on a first-clas entertainment. The company is made up of five talented artists who render exceptionally fine choruses, trios, duets and solos. The program was well balanced and was liberally punctuated with jokes and humerous sketches. The attendance was very poor considering the calibre of the etertainment.

### BAD PRAIRIE FIRE IN LOMOND DISTRICT

One of the worst prairie fires in the history of the country north of Lomond occurred on Monday when a fire swept for thirty miles from Pageant on the Sufield-Lomond line, to the fBig Bow river, covering a frontage of 7 miles in some places.

### MAY YET GET A $50 FLAT RATE

Negotiations towards a flat rate of $50 for third class passage from Britain to Canada for prospective migrants are still continuing, no settlement having been reached as yet between the overseas settlment bodies, the steamship lines and the deputy minister of immgration for Canada. Another meeting has been called for next week.

The aim of the new United States administration under Mr. Herbert Hoover is to have the strongest navy in the world. This was intimated in the Armistice Day celebration.

## Think It Over.

Hon. R. B. Bennett, in addressing the Maritime Province Club in Montreal, told a "Father Doyle" story, which he heard while visiting Nova Scotia this past summer, a story with a point to it:

"Father Doyle was walking along a road there, before automobiles were allowed on Prince Edward Island—that is not so long ago—and he was overtaken by a farmer in a democrat. The farmer said, 'Will you have a lift?" and Father Doyle said he would be delighted. He got into the democrat and opened up the conversation by asking the farmer his name. 'My name's Murphy, but I'm not a Catholic,' the farmer answered. Father Doyle suggested that they might leave religious matters alone and get along quite well together. As they neared the journey's end, Father Doyle thanked the farmer, and offered to give him a little advice from an old man of long experience. 'When you die, you hope to go to heaven?' 'I hope so.' 'Well, remember my advice. When you get there, and go up to the golden gate and knock at the door, and St. Peter says 'Who's there?' Just say 'Murphy,' and stop right there.'"

Father Doyle's suggestion that we might leave our religious differences alone and treat each other as fellow men—(say "Murphy" and stop right there),—is good advice. What, says one daily paper in commenting on this little story, is wanted is a mind and a will, and organizations, to emphasize our common needs, and our common ideals, the points upon which we can agree, rather the minor matters upon which we disagree and which will engender ill-will, strife and discord.

The recent Presidential election in the United States is an object lesson to all people. A great country of upwards of 110,000,000 people, engaged in the supremely important task of determining the personnel and policies of their Government for the next four years, have had their minds distracted from the real issue involved in the election by appeals based solely on the religious belief of one of the candidates for President. It is not that the candidate in question was a heathen, or an atheist, denying there is a God, and wholly devoted to worldly things and lacking all the finer ideals in life,—no, he believes in, and worships the same God as those who attacked him, but he was born into and brought up to respect certain doctrines and forms in one particular branch of the Christian church, just as his opponents were born into and brought up to respect and accept the doctrines and forms of worship in other branches of the Christian church. But these Christians could not agree to disagree on these minor matters and unite on the great fundamentals of Christianity itself. With what result?

Great national issues affecting the whole life and future of the country, such as the prohibitory liquor laws, the tariff, the improvement of agriculture, public ownership of public utilities versus private and monopolistic control, and other real national questions, all became confused and mixed up in the minds of millions of people with the really inconsequential subject of one man's church affiliation. And what has been gained thereby? What remains after all the shouting is over? Old friendships of a lifetime broken, feelings of bitterness and hatred engendered, communities divided which were formerly united in work for the common good.

It is but a repetition of the strife of the middle ages. Much the same thing has occurred in Canada over and over again, but no man living can point to any good resulting from such campaigns. Here in Western Canada our people pride themselves on their devotion to co-operative principles, and they can point to the accomplishment of great and lasting reforms because of their acceptance of, and devotion to co-operative policies and enterprises. But they may well ask themselves how long that good-will and harmony so essential to the success of co-operative endeavor will last, not to mention its further development and growth in order that still greater things may be achieved, if they are going to give encouragement to feelings of bitterness and take part in campaigns of division based on the manner in which their individual members worship God.

In all matters of religious differences of opinion, Father Doyle's advice is good: Just say "Murphy" and stop right there.

## Manitoba Hydro Plan

### Provincial Government Has Program That Will Extend All Over Province

It has been announced that the Manitoba Government is prepared to embark on a programme of Hydro-Electric power transmission line construction that will extend to all parts of the Province—to towns, hamlets, and farms—the Government to pay one half of the cost, including lines already built. Under this new policy there is a guarantee of sufficient power, very low rates, and revenue in the way of rentals for power sites. Thus, it has been stated on behalf of the Government, it is possible for the Government to undertake the bonusing of town and farm lines without incurring a dollar of capital debt; without the necessity of increased taxation, and without the risk of large annual deficits. This policy is designed to promote industries trroughout the Province and to lighten the labor and increase the comforts of the farm.

### Proof Enough

Scene: A Glasgow railway station.

Old Lady (for the twentieth time): Is this really the train for Ayr?

Porter: Well, mum, the board of directors, the stationmaster, the signalman, the guard, the driver, and myself think so, so I suppose it must be!

"Mrs. Green says she can't understand why her husband isn't well and out of the hospital long ago.

"She hasn't seen the nurse who attends him."

Prisoner 859466: "Stone walls do not make a prison—"

Prisoner 4487623: "Well, this here concrete seem to do purty well!"

GENUINE
PHILLIPS
MILK OF MAGNESIA
For Troubles due to Acid
INDIGESTION
ACID STOMACH
HEARTBURN
HEADACHE
GASES · NAUSEA

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## H. B. Road Nearing Completion

### Laying Of Rails Will Be Completed By Next March

The laying of rails on the Hudson Bay Railway will be completed by next March, Major Graham A. Bell, deputy minister of railways and canals, has announced, but considerable blasting will have to be done before the road can be opened for traffic. The work at Fort Churchill, where modern harbor accommodations and harbor equipment are being installed, is being pushed ahead. It will require another three years to complete this undertaking. Discussing the development of Northern Manitoba, Major Bell states that there were many evidences of mineralization along the route of the railway, particularly as far north as mileage 200 north of The Pas. He felt that those deposits would play a great part in the opening up of that sectino of the province. Five thousand men are now employed on the railway and harbor works.

## TONIC TREATMENT FOR INDIGESTION

### Indigestion Comes With a Run-Down Condition—Relief Comes Through Enriching the Blood—Dr. Williams' Pink Pills Make New Blood.

There are many symptoms of indigestion such as acute pain after eating, belching of wind, nausea and vomiting, bloating and pains in the region of the heart, a dread of food for the misery it causes. Dieting and the use of pre-digested foods may give ease, but that is all, and meanwhile the stomach grows steadily weaker. The work of digestion depends upon the blood and nerves and the only way to get rid of indigestion is to tone up the stomach through the blood, to do the work nature intended it should do. The one thorough way to do this is through the use of Dr. Williams' Pink Pills, which renew the blood, strengthen the nerves and enable the stomach to do its work with ease and comfort. Neglected indigestion means prolonged misery. If you have any of the symptoms of this trouble try the tonic treatment with Dr. Williams' Pink Pills at once and you will be gratified with the results.

Among the many who have found new health through the use of Dr. Williams' Pink Pills is Mrs. Ada Webb, R.R. No. 3, Prescott, Ont., who says:—"For a long time I went through the tortures of nervous indigestion; I call it torture because no other word can describe what I endured. If my stomach was empty I retched. If I took food I vomited. I did not sleep, and I was steadily growing weaker. I doctored for months but with no benefit. One day my husband said, as the treatment you have had has not helped you, why not try Dr. Williams' Pink Pills. I consented and he got me a supply. After I had been taking the pills for a while I knew they were helping me as the pains and retching grew less and I slept better. I gladly continued the use of the pills and in a few months I felt like a new woman, better than I had felt for years, and able to work for my husband and children again. After such a wonderful experience how can I do anything else but recommend Dr. Williams' Pink Pills."

If you need a blood-building tonic begin taking Dr. Williams' Pink Pills today. Sold by all medicine dealers or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

### Courtesy Well Rewarded

A happy result of a servant girl's act of courtesy at Leeds has just come to light. Two or three years ago the girl, named Ellen Fellowes, assisted an old lady across a busy street, and at the time the lady took a note of the girls name and address. Recently Miss Fellowes received a letter advising her of the old lady's death and a bequest of $2,000.

**Asthma Brings Misery**, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you knew as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

A German botanist is reported to have succeeded in producing 40,000 varieties of dandelions. The majority of folk will feel that one variety is nuisance enough.

"To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Hostess (to curate at the children's party): "Will you give them your song now, Mr. Meekin, or shall we allow them to enjoy themselves for another half-hour?"

**Minard's Liniment Invaluable Everywhere.**

## Northern Outposts Are Cheered By Radio

### Broadcasting Programs For Benefit Of Lonely Dwellers In Northland

Broadcasting programs to the Far North will be continued this winter, and messages will be sent to those police posts, missions and trading stations which are scattered throughout Canada's territory north of the 60th parallel. The programs commence Saturday night, November 17, at 11 o'clock Eastern standard time, the Canadian Westinghouse Company operating the broadcast in conjunction with allied stations in the United States.

Officials of the Northwest Territories branch of the Department of the Interior said that the success which had attended previous efforts encouraged them to continue. Gratifying results had been obtained, inasmuch as the lives of the men on the lonely outposts of Canada's northern empire had been greatly cheered by the contact with the world.

For the most part, the messages sent are of a personal nature, being expressions of regards from relatives of the men distributed throughout the north.

Another phase of the broadcast is one which assists the department at times in that instructions can be sent to the officials in the north, supplementary to those already given by mail.

A network of wireless stations now extends over the Northland.

## People Should Rest More

### Habit Would Store Up Reserves Of Health Says Great Surgeon

Sir Berkeley Moynihan, the great surgeon, said that one way to keep young looking is consistently and regularly to allow the nerves to rest.

A quarter of an hour's quiet and relaxation preferably in solitude, immediately after luncheon would store up reserves of health and stamina. When the famous Mayo brothers, the American surgeons, came to spend a holiday with him they never failed after luncheon to go to their rooms for a quarter of an hour's rest in complete isolation.

Another of Sir Berkeley's maxims is that every man when he reaches 60, no matter how well he feels, should take three months' holiday. "Not more than three months for the man with an active mind," he says.

### Made Best Guess

Little Albert came home from school with a new book under his arm. It's a prize, mother," he said.

"A prize? What for, dear?"

"For natural history. Teacher asked me how many legs an ostrich had and I said three."

"But an ostrich has two legs."

"I know that now, mother, but the rest of the class said four, so I was nearest."

**Nation-wide Fame.** — There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Eclectric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

### Sawmill For Prince George District

A sawmill to cut crating material for the General Motors, of Canada, is in prospect for the Prince George District, Central British Columbia, the Prince George Citizen states. The mill will be located at a point on the Prince Rupert line of the Canadian National Railways. General Motors use approximately 15,000,000 feet of crating annually.

**Useful In Camp.**—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or sprain be sustained, nothing could be better as a dressing or lotion.

### Southern Alberta Sugar Beets

The Barnwell district in Northern Alberta is coming along fast in beet growing, there being about 2,300 acres planted to the succulent crop this fall, producing an average of 11 tons to the acre, but in some cases going as high as 18.

The Guide—"Yes, it must be over a thousand years old. You can take it from me they don't build such ancient castles nowadays."

### Not Always

"I have always felt a prejudice against the word 'lady,'" said a man, "doubtless because of its frequent misuse. I have found that while every lady is a woman, every woman, of course, is not a lady."

**Minard's Liniment for Backache.**

FOR RHEUMATISM
BAYER

ASPIRIN

Perhaps you didn't realize that Aspirin tablets are made to relieve the deep-down rheumatic aches as well as dispel the occasional headache. They do! In cases of neuralgia, neuritis, lumbago; for those pains that penetrate one's very bones, Aspirin tablets offer real relief. Just be sure you are getting the real Aspirin, with Bayer on each tablet and on the box—with proven directions inside. All druggists.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

## Salads For Health

### Vegetables and Fruit Needed In Winter As Well As Summer

Do not allow yourself to get away from the daily salad habit, now that the weather is getting colder, and some of the usual salad ingredients are not at hand.

Health demands plenty of green vegetables and fresh fruit, in winter time as well as in summer. Here is an exceptionally good little salad that may be prepared at this season—at very little cost, too:

Peel oranges and remove all white skin. Cut into one-fourth inch slices and cut each slice into halves. Dice celery and apple and mix with mayonnaise. Arrange a circle of half-slices of oranges on a lettuce-covered salad plate, fill center with apple and celery mixture, and garnish with celery tips.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

### Heaviest Wheat Yield

Eight hundred and eighty-eight bushels of wheat from ten acres or 88.8 bushels an acre are reported by Fred Stinn, who farms thirty-five miles east of Calgary. This is the heaviest wheat yield ever recorded in Alberta.

## May Become a Burden

### Much Happiness Missed When Gathering Wealth Becomes An Obsession

Wealth can be a burden, once it becomes an obsession, as invariably it does. You must always go on and on, making more, once you have started. It is not sufficient to make, say, £50,000 out of a business and they say, "That will do." You cannot stand still. When you have made a good thing out of one business you are impatient to start with the next. Continually, you must fight, for once you are rich your position is being continually assailed. You become obsessed in the fight for its own sake. And in following this obsession, remember, you inevitably forego much of the simpler happiness which might be yours; there is no other way of winning through, and keeping there.

A woman's instinct is that which tells her she is right whether she is or not.

Baby's Colds

Best treated without dosing—Just rub on
VICKS VAPORUB

# A Chunk Of Coal And What Science Will Do With It In The Not Distant Future

(From the Edinburgh Dispatch)

To most of us coal is not an exhilarating subject. We grumble when we have to make up the fire with our own fair hands, we grumble when the scuttle is empty, and we grumble at the fabulous amount of shekels we have to disburse for a few bags of chunky black stuff dumped on the coal-cellar floor. Most of all we grumble when the coalman does not call and the country is in the wretched throes of a coal dispute.

To us a chunk of coal is simply a chunk of coal, and we cannot imagine why 48 nations should confer upon it, or why they should wish to discuss its past, dissect its present and map out its future. Nevertheless, more than 1,500 good men and skilful of the World Power Conference have gathered together in London for that very purpose. Obviously we must pay more respect to that chunk of coal in future, and our children will have to treat it with far more deference that we have been wont to do—that is, if they ever have the chance of seeing and using real and actual coal in days to come.

For these good, skilful fuel scientists are going to do all manner of things with coal that it never occurred to us to do. For one thing, they are going to carbonize it, which sounds dreadful; and, for another, they are going to pulverize it, which sounds far worse. The one thing they are not going to do is to burn that poor chunk of coal in an open grate or under a boiler fire in the way we and our fathers and grandfathers have been doing.

They are going to make us pay more respect to coal, and yet they are going to give it the thinnest time it ever had, or any other mineral either. They are going to subject it to that last indignity of all, the indignity of scientific classification.

No longer will it be sold by the bag or the truck, but according to its calorific value, or, in other words, its heat and energy content. Moreover, they are going to see that it is thoroughly washed and cleaned. No longer will we have to regard pieces of camouflaged slate and shale as the natural contents of the coal-scuttle.

We have kept the worst till the last.

Chemists and engineers between them are going to invent machines and processes which will squash that chunk of coal with such terrific pressure, and will warm it and warm it to such terrific temperatures, that from sheer lack of stamina it will collapse, liquify, and turn to oil, motor spirit, and so on. This they call by the kindly name of "hydrogenation."

Altogether coal is in for a very bad time. but that will not worry you and me a great deal, simply because we will not have much to do with coal in the future. We will use more gas and more electricity—at relaxed prices, we hope—and also we will use a smokeless fuel provided by the aforementioned carbonization. In this way we will have not only a bright hearth, but bright skies as well—there no longer being any smoke to belch out of the chimney.

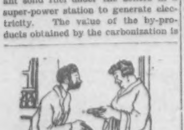
It must not be imagined that all this is mere boasting and vain-glory on the part of these fuel scientists. For instance, in Newcastle, an electricity company is able to supply current at one farthing a unit, which is the cheapest recorded in any country in the world, including Sweden and Switzerland, where they make electricity with waterfalls.

The company in question achieves this by the low-temperature carbonization of coal, and by using the resultant solid fuel under the boilers in a super-power station to generate electricity. The value of the by-products obtained by the carbonization is so great that it practically pays for the original coal, and that is how they are able to supply the current at next to nothing.

That is just one of the things that the scientists can do with a chunk of coal, but it helps to show why in the futura it is going to be regarded as something in the nature of a national crime for you and me, who run households, and for those who run works and factories, to buy coal haphazard and simply burn it in the grate or in a furnace.

In fact, the more we go into the scientific possibilities of that very ordinary chunk of coal the more awe-inspiring it becomes, to say nothing of the brains of the scientists who are busied with those possibilities. Already they extract from the coal-scuttle gas and electricity for lighting, heating, and power and transport, fertilisers for the fields, thousands of dyes and colorings, antiseptics, anaesthetics and drugs of all kinds.

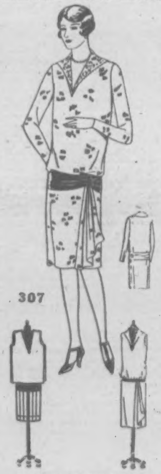
The future will see us extracting petrol from coal and beyond that there are still big possibilities at present undefined.



"Take this cake, my poor man!"
"You are too good, madam!"
"No. This sort makes me sick!"—**Moustique, Charleroi.**

**Winnipeg Newspaper Union**

*Fashion*



### Enchantingly Lovely

The youthfulness of this enchantingly lovely model interpreted in transparent printed velvet, with femininity added by lace collar, and crushed girdle of soft faille silk crepe, will instantly appeal to the woman of "Fashion." The bodice with becoming V-neckline is slightly bloused and rather long-waisted to create a flat hip effect. The three-piece skirt is wrapped around, with the right front forming drape, a slender, graceful idea for the woman inclined to be overweight. Style No. 307 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. The 36-inch size takes but 3 yards of 40-inch material with ⅝ yard of 27-inch all-over lace and ⅝ yard of 36- inch contrasting. Lustrous crepe satin, dull silk crepe, canton crepe, plain sheer velvet, wool crepe and crepe Roma are interesting combinations. Pattern price 25 cents, in stamps or coin (coin is preferred).

### A LITTLE COUNTRY PAPER

By Clara McCreary

I get a little paper from a little country town—
A far cry from the dailies, that on Sundays weigh us down;
It's printed every Friday, and it has no supplement,
Nor colored rotogravure, but I'm always glad it's sent.

It gives no clever verses by the syndicated bards,
But states that Mrs. Williams entertained some friends at cards;
"Ye scribe" saw Judge McArthur shaking hands with friends today—
It says the Curtis family sold out and moved away.

On Boulder Dam it's silent, and there's nothing on finance—
It tells that the Rebekahs gave an installation dance,
That Miss Day is returning soon to open up her school,
That Alexander Hargrave lost a valuable mule.

It's glad that Jimmy Gallagher can be around again.
It claims that the alfalfa crop is much in need of rain;
The supervisors voted for the road work to commence;
Will Anderson hauled lumber for his new garage and fence.

The worldly ones may smile at it, but theirs are tender smiles—
These home town items form a bond through many years and miles.
Oh, little country paper, with your little weekly talks!
I like to wander with you down remembered roads and walks.

## Phosphate Fertilizer

### By-Product From Trail Smelter Proves Its Worth

The Provincial School of Agriculture at Claresholm has just made public the result of an experiment inspired by the Canadian Pacific Railway, namely the use of a phosphate fertilizer, a by-product from the smelter at Trail, B.C. Tests were made on the farms of J. L. Salmon, the Pierce Farm and at the college. The fields were planted exactly the same except that, in each case, one had the fertilizer and the other had not. The former showed a yield of 54 bushels to the acre, and the latter only 46 bushels. In other words, the extra eight bushels per acre were secured at a cost of 90 cents in fertilizer.

### Cause For Thankfulness

A minister who was making a sea voyage expressed strong disapproval of the language used by the sailors.

"It's a very bad habit," agreed the captain, "but when there is real danger the lads stop swearing."

Presently the weather grew very stormy and a sailor came into the clergyman's cabin.

"It's terribly rough, isn't it?" said the minister. "Are the sailors swearing?"

"They are," replied the man.

"Thank goodness!" breathed the parson.

### Australian Oranges

Australian oranges are featuring the shop windows at some points in the west for the first time, giving healthy competition to the fruit of the nearer citrus groves. Early signs suggest that the new fruit is here to stay—adding a fresh chapter to the story of inter-Empire trade.

Greater London increases its population at the rate of 75,000 every year.

## NO DOLE FOR HIM

**SAMUEL GEORGE DODGE** was a railway porter in England but work was so uncertain that he decided to come to Canada and get something permanent. The Canadian National Railways' Colonization Department found him a place on a Saskatchewan farm. Today, after a few months' experience, he is a landholder and has made up his mind that there is nothing better than farming in the west. He has a homestead near Margo, Sask. "When I go back to England," he says, "it will be for a holiday."

## Flooring For Poultry Houses

### Cement Floors Are Found To Be Unsatisfactory

Poultry houses on the Charlottetown, P.E.I. Experimental Station floored with cement gave trouble during winter and spring on account of remaining damp. In an effort to overcome this difficulty 16 feet by 32 feet was given a liberal coating of roofing paint with the idea that it would prevent moisture coming through the cement. This treatment, however, proved of little value, as the litter became damp and unfit for use almost as quickly as where no treatment had been given. In another section a floor of matched lumber was put in and raised two inches above the level of the cement. This treatment proved a success, according to the report of the experiment recorded in the 1927 report of the station, published by the Department of Agriculture, at Ottawa. In this report the superintendent points out that the section with the board flooring remained dry, requiring cleaning only about half as many times as the section of the same house with the cement flooring only.

## Promote British Settlement

### Plan To Lend Financial Assistance In Uniting Families

The Saskatchewan Government has agreed to co-operate with the Dominion Government in a Federal plan to promote British settlement in Canada by uniting British families, Hon. George Spence, Minister of Railways, announced here following his conference with the Hon. Robert Forke, Federal Minister of Immigration. The plan provides that any British subject who arrived in Canada prior to June 6th last may secure assistance in bringing his wife and family out from the United Kingdom.

Mother: "Yes, 'e's always up to mischief. I expect 'e'll soon be followin' in 'is father's finger prints."

A man may play first violin in the orchestra, but he usually plays second fiddle at home.

### IRVIN COBB VISITS WEST

Irvin S. Cobb says that "when a good duck hunter dies he goes to the Saskatchewan marshes. In these stubble fields and along these meandering sloughs the party of which I am a member have had such sport as we did not think could be found on the continent of North America." Mr. Cobb was a duck hunting guest of the Canadian Pacific Railway at Jansen, Sask. On his way back he stopped over at High River where he is seen being fitted into shape on the Frazier Hunt ranch.

# Largest Passenger Locomotives In The British Empire Are Being Built In Canada

Thirty-one Hundred and One is about to come out of the shops. In one small corner of a bustling city of steel and men, great slabs of asbestos are being bound to her nickle-steel sides. The great drivers and the loading and rear trucks are standing on the track behind, waiting for the shop cranes to lower her from the jacks. In a little while her boiler and her fire-box will be full. Steam will be hissing and that little group of men in white collars who have been poking about for months, will stand exultantly by as the throttle is opened for the first time.

Thirty-One Hundred and One will be the second of the two largest passenger locomotives in the British Empire to be turned out of Angus within two months. Twenty-five hundred men, all of whom have made some contribution to her design or construction will stop and look up from their tools as she moves. It will be a great moment for them, as they take almost as much pride in her, each one of them, as did the office boys and stenographers who warmed the platform of Windor Station when Thirty-One Hundred made her first appearance.

The largest passenger locomotives in the British Empire! In speaking to the lay man, those gentlemen who have been so busy are very apt to draw attention to this feature. Size is impressive. One might gather too, when Canadian Pacific officers and employees speak with enthusiasm and justifiable pride of them, that a war between the locomotive departments of the railways of the world had just been terminated by an an overwhelming victory for the Canadian organization.

This is hardly the case. As a matter of fact, while the size is a consideration in locomotive design, it is by no means the primary consideration, and while the mechanical departments of all railways watch with considerable interest the developments of other lines, the problems of the different roads with respect to power requirements are so different as to leave no ground for comparisons of efficiency. The Thirty-One Hundreds are the largest passenger locomotives in the British Empire, but to the designer and the operating departments of the road, this is incidental. What is more important is the fact that they have succeeded in producing a locomotive capable of efficiently carrying out what is required of it under all conditions, at the same time keeping within the weight and other limitatons placed upon it by road-bed gauge and other conditions. They have broken ground in several features, which have required the courage of their convictions, and theirs is the gratification of the pioneer successful.

While the design and construction of the Thirty-One Hundreds was no one man's job, to one man fell the job of reducing the requirements to a final analysis, coalescing the many ideas and forming one which would embody the whole. "My job," he says, as he looks with satisfaction and affection at the photograph on the wall. What he did, in collaboration, was, from known practices and older theory, together with advanced and original theory and developments of science, evolve a mechanical giant.

C. H. Temple, whose final and crowning achievement after forty-four years of service with the Company was the creation of this mechanical giant, sat in his office on the tenth floor of Windsor Station. He was Chief of Motive Power and Rolling Stock. The Angus plant was five miles away. He visited the plant occasionally to see that various parts conformed to his ideas and he received daily detailed reports on construction progress, but until the moment of the great thrill, when the turning of the great wheels for the first time proved that the combination of a hundred theories was workable, his main vision, one which pierced the steel shell, was through blueprints and drawings, through logarithms and tables which featured the thousandth part of an inch and discovered ratios of this and that which were vitally interesting to him but not very comprehensive to you or me.

The design of a locomotive is not dictated by a desire to "go one better" in size. The design is dictated by existing traffic demands and on what it is anticipated will be the maximum requirements during the life of a locomotive. Placing that life at an average of twenty-five years it will be seen that efficient designs must be years in advance of the needs of the day. This is the reason for the Thirty-One Hundreds.

For economic reasons, the changes in freight power have been very gradual. The advance in passenger power, however, has been more rapid, and as the more general use of steel in passenger construction added thirty per cent. to the weight of passenger trains during the past few years the motive power had to be almost revolutionized.

## Fattening Hogs

### Buttermilk Found To Be Better Than Skim-Milk For Pigs

Buttermilk proved a better feed than skim-milk for fattening hogs at the Rosthern, Sask., Experimental Station. Groups of pure bred Yorkshires, Tamworths, Berkshires, and crosses from these breeds, were used. The lots receiving skim-milk and buttermilk ran on wheat pasture and received rations of 2 parts oat-chop and 2 parts of shorts. The shorts were gradually replaced by ground barley, and at the close of the finishing period the pigs were receiving three-quarters barley chop and one-quarter oat chop. The experiment was conducted for 126 days with both lots.

The superintendent of the station reviews this and other experiments in the report of the station for last year, published by the Department of Agriculture, at Ottawa. It is shown that the buttermilk fed lot made an average daily gain per animal of .185 pounds more than the lot receiving skim-milk. The amount of meal required for a pound of gain was .62 pounds higher in the skim-milk lot, and it required 1.11 pounds more of skim-milk to make a pound of gain than it did buttermilk.

## Defective Eyesight Common

### Majority Of Urban People Have Poor Vision Says Optometrist

As a result of the great strain on the eyes by the complexity of modern civilization, particularly in connection with urban life, it is estimated that seven out of every ten people in the large centres of population have defective eyesight. Jerry Britton, a consulting optometrist in Montreal, in a recent address in which he produced a moving picture illustrating this, said it was caused by the reaction of the daily demands of urban life upon the delicate organism of the eye. The effect was felt by young and old alike, he said. Human eyes are not adapted to the environment given by modern civilization, according to the speaker.

## Badger Farming

### New Fur Industry May Be Started In Saskatchewan

A new industry—badger farming—may be started in Saskatchewan by John Rothenberger, farmer, of Vanguard. Last spring Mr. Rothenberger caught a badger and four pups. He built a large pen, about 15 feet long and 4 feet wide. During summer he fed the badgers until they are now quite tame, and are said to be larger than any badger running wild. Their coats are in excellent condition and offers of $18 for each skin have been received.

Boy: "Fifth floor, please."

Elevator Man: "Here's your floor, son."

Boy: "How dare you call me son? you're not my father."

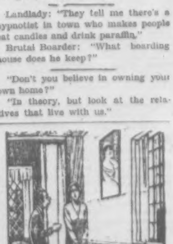
Elevator Man: "I know, but I brought you up, didn't I?"

Landlady: "They tell me there's a hypnotist in town who makes people eat candles and drink paraffin."

Brutal Boarder: "What boarding house does he keep?"

"Don't you believe in owning your own home?"

"In theory, but look at the relatives that live with us."



He: "Who is that old lady?"
She: "Me, taken twenty years ago."—Moustique, Charleroi.

## Cuticura Treatment For Dandruff

Part the hair and gently rub in Cuticura Ointment until the whole scalp has been treated. Let the Ointment remain on for some time, over night if convenient. Then shampoo with a suds of Cuticura Soap and warm water. (Do not rub Soap on the hair.) Rinse thoroughly. A light application of Cuticura Ointment to the scalp between shampoos is often beneficial.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

## WORLD HAPPENINGS BRIEFLY TOLD

China has invited the Royal Netherlands, Indies air lines to organize a flight to Java and China. The flight is expected to take place early in 1929.

The Dairy Federal Department of Agriculture reports that for the eight months ending August 31, Canada exported milk and milk products to the value of $18,482,518.

A chair and couch, once the property of Sir John A. Macdonald, Canada's confederation premier, were sold for $3.50 each in a Toronto auction room.

The British Columbia government exhibit for the Royal Winter Fair, consisting of fruits, vegetables, grains, grass seeds and other farm products weighed nearly 14 tons.

Lord Byng, as executor, gets £1,000 under the will of Lady Byng's uncle, Pandeli Ralli, while Lady Byng herself gets the bulk of the fortune of £557,000.

As another step towards augmenting its new western service, the Western Canada Airway Ltd. have placed two monoplanes in operation on its prairie passenger and express line.

The Japanese war office has asked for an appropriation of $2,750,000, spread over a three-year period, for use in perfecting air defenses at Kyoto, Osaka and Northern Kyusihu.

The post of American ambassador to England may be offered to Myron T. Herrick, present United States ambassador to France, according to an unconfirmed report circulated in Paris.

The treasury board and cabinet council having approved the absorption of the Standard Bank of Canada by the Canadian Bank of Commerce, on recommendation of the minister of finance, the Standard Bank has gone out of existence.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

### Furnished Some News

"Look, Tita; something about me in the paper."

"Really? What does it say?"

"It says, 'In the month of July the trolley company carried 15,738,526 passengers—well, I was one of them, wasn't I?"

Professor A (in high-powered car careering madly round a bend) — "We've got it at last."

Professor B — "G-g-got w-w-what?"

Professor A—"Perpetual motion. I c-can't stop this car."

## Only One Chance In Thirty-Six Billion

### Farmer In Manitoba Loads Wheat Twice In Same Car

There is one chance in thirty-six billion of it happening again.

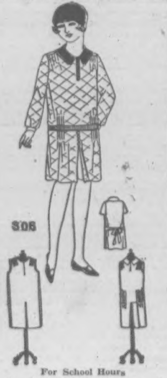
At the town of Argue, Manitoba, on September 20, a farmer named C. R. Sommerville, loaded part of his crop of Number 2 Durum into Canadian National Car No. 423871. The car went to the head of the lakes, was emptied and started west again. On October 1, eleven days later, it left the same station, Argue, loaded with grain from the fields of the same farmer, C. R. Somerville. This time the wheat was Number 4 Durum, but the car was the same and the farmer was the same.

T. P. White, Canadian National Railways' superintendent of car service, thinks the incident is a reflection on the smoothness with which the great machine of grain transportation, handling millions of bushels, is running. But he realizes that it will never happen again in his lifetime.

From statistics as to the number of box ears and shipping stations in the west, and taking an average of 75 farmers who might possibly load at a point like Argue, it has been calulated that there is one chance in thirty-six billion of a car going back to the same shipper at the same point.

Don't fall in love—the fall may break your heart!

## Winnipeg Newspaper Union



### For School Hours

A sophisticated model for the growing girl of 8, 10, 12 and 14 years, who adores to wear clothes that are quite as smart as her elder sister's. This practical little dress of bright plaid woollen with velvet collar is chosen by the younger fashionables for school hours, because it is so comfortably warm, and smart at the same time. It is a one-piece affair, tucked at shoulders and low waistline, with an inverted plait inserted at centre-front to supply extra fulness for activities of youth. It takes but 1½ yards of 40-inch material with ¼ yard of 36-inch contrasting to make Style No. 306 for the miss of 8 years. Patterned wool jersey, plain jersey, homespun, velveteen, wool crepe, tweed, wool broadcloth and chambray also appropriate. Pattern price 25 cents, in stamps or coin (coin is preferred).

Break Colds with Minard's Liniment.

## Badger Skins Are Valuable

### Pelts Should Be Taken In the Right Season, However

Badger skins, if taken off animals at the right season, and not spoiled in handling, are now quite valuable. At the recent fur auction in Winnipeg the best badger skin sold for $52.00, and a good average skin is worth, perhaps, about $20.00 to $25.00. But many people are taking these pelts during the late summer and fall, when the skins are worthless, or practically so. Badger skins are most valuable after the animals have some out of their winter retirement. Skins taken in the spring are valuable; those taken in the fall are almost worthless. About twenty-thousand badger skins are marketed annually in the three Prairie Provinces.

### Prominent Health Officials

Four prominent Canadian health officials have been appointed to the Connaught Laboratories Fellowships in the School of Hygiene, of the University of Toronto. They are Dr. R. B. Jenkins, Edmonton; Dr. F. W. Jackson, Winnipeg; Dr. F. S. Leader, Battleford, Sask.; Dr. Eva Mader, Kentville, N.S. The fellowships were established last year for the purpose of increasing the number of public health workers in Canada.

## CHILDHOOD AILMENTS

### Can Be Quickly Banished With Baby's Own Tablets

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as has Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correst diarrhoea and colic and promote healthful sleep by regulating the functions of the stomach and bowels. Concerning them Mrs. L. M. Brown, Walton, N.S. writes:—"I cannot speak too highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### A Snappy Comeback

Mum—Forgot it—huh! Halways forgettin', you are! Tell you men hanything and it goes in one hear the hout the hother. Dad (stung to protest)—Tell you women anything, and, by gum, it goes in both ears, and never stops coming out your bloomin' mouths.

Family trees aren't like others. In others, appearance of the sap is an indication of continued vigor.

Minard's Liniment Heals Cuts and Bruises.

## Loud Speaking Airplanes

### New Form Of Advertising Making Cities More Noisy

The advance of aviation has brought with it one development that cannot be regarded with equanimity.

In New York certain airplanes equipped with loud speakers fly over the city and indulge in outdoor advertising at its worst. Voices from these flying loud speakers bawl forth the merits of this or that face cream, movie, cigarette or what-not in a manner that can be heard all over the town. There is no escape from it. Any one in the streets below gets this racuous appeal to buy drummed into his helpless ears, whether he likes it or not.

Our cities are noisy enough now. It might be a good thing to see if the statutes governing public nuisances cover the case.

### Took Drastic Measures

The fact recently has come to light that the very oldest newspaper in existence is, or was, the official "Pekin Gazette," which is said to have been produced continuously for more than a thousand years. But this Methuselah among newspapers not only claims an honorable old age. It claims a record in martyrdoms as well. It is credibly stated that during its pubication no fewer than 1,500 of the paper's editors have been executed. If this is correct, just imagine what the slaughter must have been among reporters.

Husband (reading latest about radio-television): "My word! This opens up some wonderful possibilities, dear."

Wife—"Yes, my love! Won't it be nice for me to be able to sit here and watch you working in your office when you're kept there at nights!"

Grocer—"Yes, lady, these eggs are fresh from the country."

Suspicious Customer—"What country?"

**When Capt. Malcom Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of "good, strong tea." The courageous Captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Sold by your grocer in clean, bright aluminum packages.** 16EW

## Northern Alberta Boys' and Girls' Swine Club

### First Prize In C.P.R. Competition Is Won By Members Of Club At Willingdon

First prize in the Canadian Pacific Railway Competition in the Boys' and Girls' Swine Club show for Northern Alberta, was won by Parafie Lazuruk and Harry Strynadka, members of the Swine Club, at Willingdon, on the New Canadian Pacific Railway Cutknife-Whitford line.

Second prize went to Benny Flaads and Bernie Kobitzsch, of the Hardisty Club, and third, Thurston Smith and Erwin Berguf, of the Sedgewick Club.

Handsome medals were presented to members of the winning team by Superintendent George Fox, of the Edmonton Division of the Canadian Pacific Railway. Both members of the team are of Ukrainian descent and are sons of prosperous farmers in the district. Each of the boys is 17 years old. Strynadka is in grade ten at Desjardiis school, and Lazaruk is working on his father's farm.

The Willingdon team will proceed to Calgary where they will compete with the winners of the Canadian Pacific Railway competition in the southern part of the province, for the trophy awarded to the highest scoring team from any point along Canadian Pacific railway lines in Alberta, and a trip to the Toronto Royal as guests of the railway.

Local officials of the railway companies, of Provincial and Dominion departments of agriculture and livestock interests, are well pleased with the successful results of the Boys' and Girls' Club work during the past season, and credit is given to these clubs for much of the improvement noted in recent years in the quality of hogs shipped to market from many districts in the province.

### His Explanation

District Visitor—To what do you attribute your great age? Oldest Inhabitant—Well, for the first seventy years of my life there wasn't no motor cars, an' for the last thirty years I've been confined to the house.

More than 2,000,000 women in Soviet Russia are members of trade unions.

It May Be *Urgent*

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's
CASTORIA

## SUNDAY SCHOOL LESSON

NOVEMBER 18

### PAUL'S EXPERIENCES IN JERUSALEM

Golden Text: "Be strong in the Lord, and in the strength of His might."—Ephesians 6.10.

Lesson: Acts 21.17-23.35.

Devotional Reading: Ephesians 6. 10-20.

### Explanation and Comments

Paul's Request, 21.37-39.—Read the earlier verses of this chapter. Paul is standing on the stairway leading from the outer court of the temple up to the Tower of Antonia, and before him is Claudius Lysias, chief captain of the band. "May I say something unto thee?" courteously Paul asked, speaking in the Greek language. In surprise Lysias asked in his turn, "Dost thou know Greek?"

"And was it not a needless surprise? Paul was a university man. He was cultured to his finger tips. He had one of the greatest brains of history. We all often reproduce the role of the Chief Captain. We were amazed how well read and intelligent was that unassuming man. But our surprise was needless. Assumption is not culture. The spiritual quality of men and women often surprise us. We say, "I never thought that man was such a Christian." "I never dreamed that woman could have been such a heroine amid sorrow." But we did not know them any more than Lysias knew Paul. And we did not know their inner life of devotion to the Saviour of the world. We knew not their prayers, their unseen sessions with their Bible, their gracious investiture with the Spirit of Christ."—Dinsdale T. Young.

"Give me leave to speak unto the people"—this was Paul's request of the Chief Captain. "Get me safely out of this, away from this mob," would have been the anxious plea of most men in Paul's position, and perhaps it was surprise which led Lysias to allow Paul to speak to the howling Jews below him.

"Great duties are before me, and great songs;
And whether crowned or crownless when I fall,
It matters not, so as God's work is done."—Alexander Smith.

Paul's Address, 21.30 to 22.21.—Then Paul, torn and bleeding as he was, and chained to two soldiers, stood upon the stairway above that howling mob who were thirsting for his blood, himself perhaps the only calm man there, and addressed them in their own language, Aramaic, a dialect of the Hebrew. He defended himself from the charge that he was an enemy of the people, of the law, and of the temple. He told them that he was an Israelite, and though born in Tarsus he had been educated in Jersualem, at the feet of their famous rabbi Gamaliel. He had been most zealous in persecuting the Christians, had even started for Damascus with letters from the Sanhedrin allowing him to seize and bring back in chains all the Christians he could find. Many of those to whom he was speaking must have known and recalled these facts. Next, he wished to defend his Christian faith, and he told them about his wonderful conversion, about his interview with Annanias and the restoration of his sight, and about his return to Jerusalem and his baptism. If the Crucified Jesus had appeared to him in such power, then he must be the Messiah whom he, as a Pharisee, had so longed to see; and if the Risen Jesus is really the Messiah, then Paul must as a righteous Israelite, yield him willing obedience and bear his witness for him.

Yet another aim had Paul, the aim of all his preaching; He would win even that mob over to a favorable opinion of this Jesus who could change in a moment of time a bigoted Pharisee into an active Christian. And finally, he justified his work among the Gentiles as the fulfilling of the express command of his Lord.

## Recipes For This Week

(By Betty Barclay)

### VEAL BIRDS

2 pounds veal steak (sliced about ½ inch thick).

Cut steak into six to eight squares, depending on the size of bird desired. Marinate with salt and pepper. Place a heaping tablespoonful of Piquant stuffing on each veal square and skewer securely using at least four skewers for each bird. Brown in deep fat first and then place in roasting pan in which frying fat has been poured. Add 1 cup water, cover roaster and let bake in slow oven for an hour. (Enough for six or eight veal birds).

### A BRAND NEW RAISIN SAUCE

½ cup chopped nectars raisins.
2 tablespoons butter.
2 tablespoons flour.
1 teaspoon salt.
¼ teaspoon pepper.
Speck cayenne pepper.
1 tablespoon brown sugar.
1½ cups water.
1 tablespoon grated horseradish.
1 small lemon, juice only.

Heat food chopper in boiling water and put raisins through using medium cutter. Melt butter in saucepan, add flour, salt, pepper, cayenne, and brown sugar. Mix well, add water and cook until mixture is thick, stirring constantly. Add chopped raisins, horseradish and lemon juice. Serve hot.

Since ignorance is bliss it seems folly to establish night schools.

Coughs soon stop *with*

Mathieu's Syrup
OF TAR & COD LIVER EXTRACT

*Sold in generous size bottles by dealers everywhere.*
The J. L. Mathieu Co., Props., Sherbrooke, Que. 6-27

## Tomb Of Columbus Found

### Mementoes Indicate His Burial Near Badajoz, Spain

A commission sent by the Academy of History to investigate what is claimed by some to be the tomb of Christopher Columbus, at Oliva de Jerez, forty-five miles south of Badajoz, Spain, reported that there were traces in the Church of Santa Maria Grecia, indicating mementoes of Columbus. The commission also stated that a number of stones had been found with the inscription: "Here lies Christopherus Sanchez Enriquez, Grand Admiral of the Oceans and the Lands by Him Discovered, born 1441." Enriquez is contended by some authorities to have been the real name of Columbus.

## Canada's Pacific Gateway

### Vancouver Rapidly Becoming One Of North America's Busiest Ports

Ships in the port of Vancouver took 80,000,000 bushels of last year's Canadian grain crop for export to markets abroad. It is estimated that Vancouver's share of the record harvest this year may be nearer 120,000,000 bushels. This splendid shipping business out of Canada's Pacific gateway has grown from 1,500,000 bushels in 1921. As fast as new elevator accommodation is made available, an increasing volume of wheat from Alberta and the western part of Saskatchewan is being poured into ships on the Pacific Coast. Much of it is carried south through the Panama Canal to Europe. Other grain-laden ships are heading out across the western ocean to Japan. Vancouver may well look forward with optimism to becoming one of North America's busiest ports.

In addition to attracting an increasing proportion of the present Canadian wheat crop, it is quite probable that Vancouver will become the port of a magnificent new expanse of farming land in the Peace River country, north of Edmonton. The Peace River flows across northern Alberta into Lake Athabasca. The farming country named after the Peace has an area of about 47,000,000 acres. It is, in part, in the same latitude as Scotland and Denmark. Some of the settlers in the Peace River country are raising wheat in crops of 70 bushels to the acre.

### Crop Estimate

The Northwest Grain Dealers' Association estimates this year's wheat crop at 558,459,600 bushels, and that of other grains as follows: Oats, 317,714,800 bushels; barley 91,375,000; rye, 11,809,000, and flax, 5,079,200.

"What are you doing in that tree, professor?"

"I'm hanging myself."

"But you must put the rope around your neck."

"I tried that, but I could not breathe."

Teacher—Why, Marie! How can you come to school when your little brother has scarlet fever?

Little Marie—Well, Miss Brown, he's only my half-brother.

LADIES WANTED—To do plain and light sewing at home, whole or spare time. Good pay. Work sent any distance, charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

# Problem Of Tuberculosis

### Conference Called At Instance Of the National Research Council

A group of research workers, including a number of Canada's most emient scientists, will gather in Ottawa very shortly to attend a conference called at the instance of the National Research Council. The meeting has been set for December 13 and 14, with tuberculosis, both as it assails the human being and animals, the chief subject of consideration. The conference will be under the joint chairmanship of Dr. J. M. Tory, President of the Council and Dr. J. H. Grisdale, Deputy Minister of Agriculture.

A special committee appointed to undertake a program of research work on the problem of tuberculosis has been working on a program laid down more than two years ago. Full reports on the results of study and experimentation carried out during the past year, will be submitted and discussed.

Among the investigators who will attend the conference are:

Dean A. C. Rankin, University of Alberta; Dr. Watson, of the Federal Department of Agriculture; Dr. J. C. Meakins, and F. C. Harrison, McGill University; Dr. F. G. Ferguson, Qu.-Appelle, Sask.; and Dr. Andrus, Queen Alexandria Sanatorium, London, Ont.

According to Dr. Tory, all sessions of the committee will be held in camera.

It was also announced that a meeting of the committee on grain research would be held in Winnipeg on December 3 and 4, when reports on the year's work on the study of damp and tough grain will be presented and if approved forwarded to the board of grain commissioners. In addition, the committee will consider what further steps will be taken in connection with the commitment by parliament last winter to the National Research Council and Board of Grain Commissioners on the relation of protein content to the grading of grain.

Dr. Tory intimated that encouraging progress was being made with plans for the new Dominion Research Laboratories, provision for which was made at the last session of parliament.

---

Bride-To-Be: "Well, what did your friend say when you showed him my photograph?"

Her Fiance: "Nothing; he just pressed my hand in silence."

---

"Got any old clothes for the heathen?"

"My daughter has some cast-off garments, but I'm afraid the heathen wouldn't wear such clothes."

---

A casual review of those who attend church would incline one to the belief that the choir in heaven will be largely soprano.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. John Benson, 162 N. Christina St., Sarnia, Ontario.

N. W. U. 1759

## Largest Elevator Opened

### New Terminal Elevator At Port Arthur Has Capacity Of 7,200,000 Bushels

The Saskatchewan Wheat Pool new terminal grain elevator with a capacity of 7,200,000 bushels was opened recently for operation. It is claimed that this elevator is the largest single unit and the fastest operating terminal elevator in the world.

This new elevator is served by both the Canadian National and Canadian Pacific Railways at the head of the Great Lakes. It will be able to receive as many as 500 cars of grain per day during the rush season and has a capacity of 300 cars per day of ten hours, and will be able to ship out grain at the rate of 150,000 bushels per hour.

The total length of the new elevator, known as Terminal No. 7, is 1,344 feet, and the width 226 feet. The elevator trackage provides space for 225 loaded cars to be spotted at one time, ready for dumping by the five automatic car dumpers, each of which will completely unload a car of grain in ten minutes on the average. To take care of this immense volume of grain there are 28 elevator legs to take the grain to the top of the elevator, from whence it is dumped into the scale garners.

The completion of this terminal elevator gives the Saskatchewan Wheat Pool a total capacity of 22,975,000 bushels at the head of the Great Lakes which, together with a 2,000,000 bushel terminal elevator at Buffalo, and the space provided by the Pool country elevator system in Saskatchewan, will glev a total grain storage capacity of fore than 50,000,000 bushels for the current crop year.

## Enthusiastic About Canada

### Famous American Author Predicts Great Development In North

"Don't think it was merely being at the end of steel that makes me talk in superlatives," said Courtney Riley Cooper, famous novelist and magazine writer, "because I have been at the end of steel in other places, but I regard the building of the Hudson's Bay railway as an achievement never paralleled on the American continent. There is a big story in it. I am crazy about Canada, and I am coming back here when you open up Churchill. When the steel reaches Hudson's Bay there will be one of the biggest gold rushes in history. The north is full of its rumors."

Mr. Cooper, with Evan David, another well known magazine writer from the United States, went north to The Pas, saw the Flin Flon mine, and by train and speeder provided for them by the Canadian National Railways engineers, went as far as the end of steel on the Hudson's Bay line, after that hiking up to the air base some miles farther.

## Exports Of Dairy Products

### British Isles Is Canada's Best Customer For Cheese

For the first eight months of 1928 ending August 31, Canada exported milk and milk products to the value of $18,482,518.

The British Isles is Canada's best customer for cheese, the product which heads the export list with 51,743,400 pounds, valued at $11,309,448. The United States took all the cream and fresh milk exports amounting to 2,124,113 gallons of cream worth $3,849,160, and 2,418,246 gallons of milk worth $509,151. The other dairy exports were made up of butter, condensed milk, milk powder, evaporated milk and casein.

An insects eyes are always in its head, but its hearing apparatus may be in its legs or other parts of the body.

## Farming In the North

### Saskatchewan's Most Northerly Farm Located 150 Miles North Of Prince Albert

Saskatchewan's most northern farm has been discovered. It is at Beauval, an Indian mission, 150 miles north of Prince Albert, which is on the North Saskatchewan River. The mission farm is large, and grain has been grown there successfully for twenty years. In the two decades there was damage by frost only three times, and then it was but partial. This year there was a heavy crop of wheat and oats. All kinds of vegetables and flowers are grown, also tobacco. A herd of 65 head of cattle, 16 horses, 100 hens and pigs are kept The farm and other mission buildings are electrically lighted and have running water, in fact the whole equipment is equal to the most modernly equipped farm in the older settled parts of the province, and more self-sustaining. The power for the light and water services is furnished by a hydro-electric plant. Beauval is situated between latitude 55 and 56. Grain and vegetables have also been grown at Stanley mission, a little further north, on the Churchill River, for many years, but not on such an extensive scale as at Beauval. It will be of interest to a great many readers of the "Last West," to learn that so far north in Saskatchewan climatic conditions are no bar to successful agriculture.

## Distance Covered In Second

### Electric Current Travels Thousand Miles In That Time

A fly can cover twenty-four feet in a second, and a man can only make four feet in that time, although on skates he could manage thirty-eight feet. An express train, going at the rate of sixty miles an hour, covers eighty-eight feet per second, whilst a swift-flying bird, such as the swallow, can dart through two hundred and twenty feet within the time. Waves traverse the ocean at the rate of seventy feet per second; whilst sound, in the same time, manages eleven hundred, and light rushes along at the rate of two hundred thousand miles. The electric current can cover one thousand miles per second, but if generated in a Leyden jar it can cover the enormous distance of nearly three hundred thousand miles.

### Canada's Butter Queen

Mrs. John Todd, of Manitoba, has without a doubt achieved the distinction of being Canada's most successful dairy buttermaker. Exhibiting at fifteen Canadian shows, she has taken thirteen first, and two third prizes. At Brandon, Regina, Vancouver, Ottawa, and Toronto, she took all firsts; at Calgary, one first, and one third, and at London, two firsts and one third.

### It Would Be a Bill

An American woman, staying at the Savoy, in London, England, recently received a letter. It was enclosed in three envelopes, had been readdressed 28 times, and displayed twelve extra stamps. It had followed her all over the world, from Singapore to South Africa, and Egypt. When she opened it she found it was a bill for candy she had eaten two years before.

### Lime Burning

Lime is burned in every province of Canada with the exception of Prince Edward Island and Saskatchewan. Both high-calcium and magnesium limes are producel from the limestones of Nova Scotia, New Brunswick, Ontario and Manitoba, but in Quebec, Alberta, and British Columbia high-calcium limes only are produced at present.

---

"So she's given up all animal food?" "Yes, she won't even eat horseradish."

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so.

"A friend advised me to take

MILBURN'S HEART AND NERVE PILLS

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

ENDURANCE

Children and adults steadily increase in vigor and endurance on health-giving

Scott's Emulsion

It is invigorating cod-liver oil that tastes good and builds up body and strength effectively. Always use Scott's Emulsion!

Scott & Bowne, Toronto, Ont. 25-65

## New Machine Perfected

### Will Measure Moisture In Any Substance Almost Instantly

Another feat of scientific research described by grain and furniture men as a "perfect knockout," is acknowledged at Ottawa, and confirmed by the physics department of the University of Toronto, where the invention has been perfected. The result is a machine for measuring, almost instantly, to the slightest fraction, the moisture in any substance as it depends on the electrical conductivity.

The machine, which has caused a sensation among practical industrial leaders as well as scientists, has been perfected by Arnold Pitt, a graduate of the department of physics, working under the direction of Dr. E. F. Burton.

Results that will benefit the grain trade of Canada are to be announced in the near future. Its importance to the grain and lumber trades in calculable. Millers when they grind wheat have to know exactly the right percentage to put in the flour. Too much moisture makes musty flour and bread. All the grading of grain depends upon its moisture content.

The new invention reduces hours to seconds in measuring moisture in wheat. It not only annihilates time but it ensures infallible accuracy. With present methods moisture content of wheat is measured from samples baked in an oven in such a way that the moisture driven off is collected in absorbent material which is weighed before and after the process.

"It takes some hours to make a "run" of wheat under the present methods of moisture measurement and at the university they now do it in ten minutes by the use of tre new machine."

## Little Helps For This Week

"Give me leave to speak unto
"For what dost thou make request?"—Neh. ii. 4.

Oh let me feel Thee ever nigh me!
And seek Thy smile all gifts above;
No good thing will Thy grace deny me,—
The object of Thy changeless love.
—Anna Shipton.

If we pray for any earthly blessing, we must pray for it solely "if it be God's will," "if it be for our highest good"; but for the best things we may pray without reservation, certain that if we ask, God will grant them. No man ever yet asked to be, as the days pass by, more and more noble, and sweet, and pure, and heavenly-minded; no man ever yet prayed that the evil spirits of hatred and pride, and passion, and wordliness might be cast out of his soul—without his petition being granted, and granted to the letter.

—Frederic W. Farrar.

## Opening the Sky Line

### For Purposes Of Surveying Timber Must Be Cut In Forested Country

One of the most arduous and continuous duties of a Canadian survey party in forested country is the cutting of the sky line. On either side of the line being surveyed, be it boundary or anything else, the timber is cut wide enough to give a clear opening to the sky of at least six feet. This means that the clearing is from ten to sixteen feet wide, or more, on the surface of the ground according to the nature of the timber. Where the line passes through muskeg covered with small stunted spruce, a party can average about two miles a day, but where heavy timber is encountered, half a mile a day may be a good day's work of ten hours. It is a curious fact that the easily cut line through muskeg will remain clear, perhaps, for 50 years, whereas the lines through the heavy bush will grow up much more quickly.

---

The Vicar: "Ah, Mrs. Maggs, I, too, have had to pinch all my life to make both ends meet."

Mrs. Maggs: "Lor', sir, ain't it lucky you were never caught!"

---

Bones of at least 2,000 hippopotami killed by prehistoric hunters were found in a single cave in Sicily.

## Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

### ACID MOUTH

"Acid mouth" denotes a condition in which the saliva is acid in reaction—turning blue litmus red.

Normally, saliva resting in the mouth is neutral or very slightly acid, while saliva as it flows from the glands is but slightly alkaline.

The danger of real "acid mouth" in which the saliva exhibits a marked acid reaction is that the acid content injures tooth enamel and, bringing about a general weakening of tooth structure, giving rise to decay.

But normally the salivary glands will not tolerate for long a marked acidity in the mouth as they are stimulated by the very presence of the acid content to a flow of slightly alkaline saliva to neutralize it.

For example: You may eat some citrus fruit, grape fruit, or orange, and from the presence of the fruit acids the saliva in the mouth will give a marked acid reaction. But this condition will remain but a few minutes as a rule, the saliva returning shortly to neutrality or near-neutrality.

There appear to be, however, real cases of "acid mouth" in some individuals, and to combat this they are offered both alkaline dentifrices and pastes in which are incorporated fruit acids.

Nevertheless, exhaustive tests have proven that mouth acidity or alkalinity cannot be controlled by foreign substances for any length of time.

A real case of "acid mouth," therefore, can only be permanently remedied by a diet that will build up the alkaline reserve of the body to combat "acid mouth."

In general, milk, fruit and vegetables build up the alkaline reserve of the body, while eggs, meat, cereal and bread deplete it. The average diet, meat, bread, potatoes and pastry, tends towards acidosis, or a depleted alkali reserve.

Hence, it is not so important whether we use this or that dentrifrice, as that the tooth brush may be habitually employed for the maintenance of a clean healthy mouth.

## Salt In Canada

### Produced Principally In Ontario and Nova Scotia

Common salt (sodium chloride), is obtained in two forms, in solution in a saturated brine, from which the salt is extracted by evaporation, and in lump or solid form by direct mining. During the year 1927, salt was produced in southern Ontario, and in the Malagash salt district, Nova Scotia. Ontario salt is obtained from brine wells, while Malagash salt is recovered by mining rock salt. A small quantity was also shipped from stock from the McMurray field in Alberta.

The Canadian production of salt, except for small exports, is sold in Canada principally to the dairy, meat-curing, fisheries, and chemical industries, and as table salt for household use. The market for salt in Canada is steadily increasing.

### Two Crops Of Potatoes

C. H. Lager, Professor (not of agriculture but of languagees), in Brandon College, has grown two crops of potatoes in one season. Both crops were raised on the same plot of land—the field being first dug up and then planted.

---

The great problem is distribution. Think of legs like that being wasted on a kangaroo, far from street crossings.

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk, always handy?

When called upon at 3, Bushness Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar.

"Again when I fell over a steel fender and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleansed and healed the wound." All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

## Singapore Naval Base

### British Government Building String Of Aeroplane Bases In South Pacific

The British Government is having built a string of aeroplane bases extending from Singapore through the South Pacific Islands to Australia, according to James Boyle, newspaper publisher of Sydney, N.S.W., who arrived at Victoria recently.

Work is proceeding night and day on the big naval base at Singapore, said Mr. Boyle. The huge drydock there is near completion and aeroplane hangars and fields and oil depots are being established.

Throughout the islands oil bases are being established, Mr. Boyle said. At present work is being carried out at Port Darwin, where a number of oil tanks are being set down along with other facilities for aeroplanes.

## May Sell Indian Lands

### More Than 20,000 Acres In Peace River District May Be Sold By Auction

More than 20,000 acres of Indian lands, which include some of the best agricultural areas in the Peace River District are likely to be sold at auction in the near future. This action will in all probability follow a survey that is being made in the north country by W. Morrison, inspector of Indian Agencies for the three western provinces, with headquarters at Regina.

Keep in mind the S. O. E. whist drive and dance in Cliff hall on Friday Nov. 23rd. W

* * *

Ken Horne left last week for the Pacific coast where he has been engaged for the winter to play hockey. He caught a place on the Portland team.

* * *

A gas eploxsion in the home of Mrs. J. Johnson, of Medicine Hat blew two walls out of the house. Mrs. Johnson had been down town ad o returning lit the kitchen stove when the explosion occurred. Although the house and furniture were badly damaged Mrs. Johnson escaped.

The promotion of two of Canada's best known hotelmen to important posts in the service of the Canadian Pacific Railway has been announced by the hotel department of the company. B. A. Neale, manager of the Chateau Frontenac at Quebec, has been appointed manager of the new 1,200-room skyscraper hotel in Toronto, the Royal York, which will be opened to the public next summer. His place in the great hotelery at Quebec will be taken by John Johnston who has been assistant manager at the Chateau for some time.

The distribution of dividend money every three or six months to shareholders of industrial and commercial enterprises in Canada runs into many millions of dollars a year. The money goes to an army of people throughout the country many of whom depend on it for their living and it has much to do with the continued prosperity of Canada. About 88 companies are listed on the Toronto Stock Exchange a small part of the total number of those making regular dividend disbursements in Canada, but for the third quarter of this year these 88 companies distributed in dividends over twenty million dollars, of which the Canadian [illegible] alone accounted for $7,-[illegible]000. This was by far the largest distribution [illegible] company, [illegible] next [illegible] 1951 608. [illegible] number who regularly benefit [illegible] these distributions of profits [illegible] every year, thus show[illegible] general tendency [illegible] to [illegible]

FOR SALE—one 5 ft. McCormick mower in good repair; one John Deer plow; one 16 inch stubble bottom; one 14 in. breayer bottom; one small stack of hay 5 or 6 tons; may be seen on N. E. quarted of 6-[illegible]-7, 8 miles west of town. M. Soderholm.

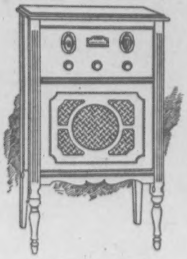
LISTEN TO A Westinghouse RADIO



Westinghouse Battery Console
Price without tubes $167.00

For True-to-Life Tone Quality

EVERY Westinghouse Set will reproduce with fidelity the "true-to-life" tone quality of the music and voice as created in the studio.

You have only to listen to the improved 1929 models to realize the advance Westinghouse has made, in the science of Radio Reception.

One control gives you accuracy and ease of selecting the station you want.

Distant stations brought in with clarity and volume.

Full six tube power at all times.

Selectivity, finely balanced, giving equal performance in the upper and lower wave bands.

New improved cone speaker, developed by Westinghouse.

*We will gladly give you a demonstration*
